THE NOMAD

WIRELESS CAMERAS

Rapidly Re-deployable

NOMAD systems are entirely re-deployable, easy to install in almost any location and can quickly be re-positioned. Using Wi-Fi, 3G or 4G, our systems can be setup and accessed from almost anywhere in the world.

With the fast and easy installation via our highly compatible mounts, it becomes far easier to install NOMADs quickly and efficiently.

Monitored in our 24/7 control room

Once the camera has been installed, we can connect using 4G wireless data in our state-of-the-art control room. We can watch the camera live and download any footage needed

Ready for Expansion

All NOMADs come equipped with expansion options for use with ANPR (Automatic Number Plate Recognition), speaker systems, 4K cameras, wireless transceivers and many more.

Future Proof

NOMAD systems have been designed with the future in mind. With our market leading IP based hardware, we can offer years of upgrades and refurbishments to ensure your NOMADs are always at the forefront of surveillance technologies.

Hertfordshire CCTV Partnership Ltd

Control Room Services

24/7 CONTROL ROOM

Our Control room is manned 24/7 by experienced CCTV operators with many years of service.

INSTALLATION & MAINTENANCE

Our maintenance team are ready to survey your CCTV requirements and install a professional CCTV system and link it to the control room.

RE-DEPLOYABLE CAMERAS

We can provide a range of redeployables manufactured by Rapid Vision that can suit a need for less static issues. These can be deployed on any suitable light columns or wall.

RADIO MONITORING

Using the latest in Radio Monitoring technology we can monitor town link and site radios 24/7.

COMMUNICATIONS

As we are a 24/7 Control Room we can look after any communications and checks you need. Anything from Lone Workers to Out of Hours calls.
